

Rahul Manocha

5+ years in Data Science

📞 7986551144 ✉ rahul.rmanocha@gmail.com 📍 Fazilka 🔗 Web Portfolio

👤 PROFILE SUMMARY

Accomplished Data Scientist with expertise in data pre-processing, business intelligence, and machine learning to deliver impactful solutions. Proficient in data transformation, visualization, and process automation, generative ai with a proven track record of leading innovative projects and driving data-driven decision-making.

📁 PROJECTS

Google Analytics 4 Data Fetch via API 🔗

Developed a Flask-based web application to retrieve and display Google Analytics 4 data via API integration. Enabled seamless data access and visualization through an intuitive HTML front-end interface.

20+ E-Commerce Websites Web Scrapping Projects 🔗

Developed web scraping pipelines for over 20 e-commerce websites using Selenium, BeautifulSoup, Requests, and Pandas. Extracted, cleaned, and analyzed competitor pricing data to assist the marketing team in setting competitive prices for our own products.

Gardening Planner using Generative AI 🔗

Developed a Gardening Planner using Generative AI (Llama 3) and an RAG pipeline to provide personalized gardening recommendations. The planner customizes plant suggestions, care tips, and pesticide recommendations based on user inputs like soil type, budget, and hardiness zone.

Customer Segmentation using Machine Learning

Implemented customer segmentation using historical data by performing **RFM analysis** and **K-Means clustering**. Identified and segmented potential customers to enable targeted marketing strategies.

E-Commerce Reviews Analyzing System 🔗

Developed an E-Commerce Reviews Analyzing System with a Streamlit-based interactive dashboard to visualize product and category review trends. Conducted **sentiment analysis using VADER (NLP)** and generated word clouds to identify key customer concerns and preferences.

👜 PROFESSIONAL EXPERIENCE

Jan 2025 – present

Alternative Path

Web Scraping - Data Engineer

As a Web Scraping Engineer at Alternative Path, I am responsible for designing, developing, and maintaining robust, scalable, and efficient data extraction pipelines to support various data-driven business needs. My role primarily involves end-to-end data acquisition and processing using modern web scraping and ETL frameworks.

Key Responsibilities

- **Web Scraping & Automation**
- **Data Engineering & ETL Pipelines**
- **Workflow Orchestration**
- **Data Quality & Validation**
- **Collaboration & Documentation**

Kinerk Direct Marketing Solutions

Feb 2023 – present
Mohali

Software Developer (Promoted as SD Data Science)

- **Developed custom RAG pipelines** to effectively retrieve relevant information from large data sources, enhancing accuracy and relevance of model responses in specific projects.
- **Optimized open-source LLM integration** by selecting and fine-tuning models that align with the unique requirements of each project, balancing model performance with computational efficiency.
- **Ensured seamless integration** between RAG pipelines and LLMs, implementing best practices for data retrieval, context management, and latency reduction to enhance user experience.
- **Conducted performance evaluations and tuning** to maintain optimal results in varied use cases, leveraging model metrics and retrieval precision to refine pipeline performance continuously.

Apr 2021 – Feb 2023
Mohali

Web Admin (Data Analyst)

- Fetched and transformed relevant data into visually presentable formats, showcasing the to bridge the gap between technical intricacies and user-friendly presentations.

- Designed and developed compelling promotional emails by leveraging proficiency in HTML and CSS, ensuring visually appealing and effective communications.

SKILLS

Python

Flask, Pandas, Numpy, Streamlit

Machine Learning and Deep Learning

Scikit Learn, TensorFlow, Keras, Pytorch

Deployment

Apache Airflow (DAG design, task scheduling, monitoring)

Databases

SSIS, SQL Server, SSMS, MySQL, NOSQL

DevOps

Docker, CICD Pipeline, Github Action

Web Scraping

Selenium, Scrapy, Playwright, ETL, QC

Data Visualization

Tableau, Power BI, Matplotlib, Seaborn

Generative AI

Fine-Tuning, RAG pipeline, LLM

EDUCATION

Jun 2023

Masters in Data Science

Chandigarh University

Jun 2019

Bachelor of Computer Application

Mr. Govt College (Panjab University)

CORE COMPETENCIES

- Generative AI
- Predictive Modeling
- Machine Learning
- Power BI Dashboards
- ETL (Extract, Transform, Load)
- Large Language Model
- Statistical Analysis
- Project Management
- Business Analytics
- Cloud Computing

CERTIFICATES

Google Data Analytics Professional Certificate | 2022
